Network Simulator for CCNA™

FREE CCNA Cheatsheets are provided free with every purchase of CCNA Exam Simulator or Network Simulator.

Network Simulator for CCNA™ provides advanced router/switch network simulator functionalities including VLANs, VTP, interVLAN communications, RIP v2, OSPF, and WAN protocol simulation. The important features of the CCNA NetSim are given below:

Router Network Simulator

- Lab exercises -currently 100+ labs are included with scenario type labs for NAT, OSPF, EIGRP, Access Lists, and others.
- Router and switch IOS simulator. For beginners, a simple router/switch device simulator has been provided.
- Simulate Cisco® IOS routers and Switches, supports 17XX, 25XX, 26XX, and 36XX routers, and 19XX, and 29XX switches.
- 300+ router/switch commands are supported for thorough preparation.
- Labs for switches including 19XX and 29XX switches included in the Lab Manual provided with the software.
- Detailed help files that provide step by step instructions on using the simulator have been provided.
- The demo version is limited to a fewer labs, and upto global configuration mode is supported in demo version.
- Supports short form commands, and tab in IOS simulator.

Several lab exercises are made available with the router simulator. The labs are intended to give familiarity with the router or switch commands. [Example labs can be viewed here](#). Complete list of labs is available with the Labs Manual of the downloaded software.
